University of Exeter

COM2020 – Team project

Clinic 4: Presentation skills & writing effective reports

Facilitated by TA: Ridi, Namia, Oscar and Assylay

Today you will

- Plan and practice your presentation (slides, timings, demo)
- Decide what ***evidence*** to show
- Setup the report structure and split up the writing

Your message – 10 minutes

University of Exeter

Keep every slide/report paragraph consistent with these 3 sentences.

Problem

[Users] struggle with [problem] in [context], causing [impact].

Goal

We aim to [do what] so that [users] can [benefit], measured by [metric].

Claim

We built [system/prototype] that [key capability]. Evidence: [result + dataset /test /users].

Task 1

As a team:

- Write all 3 sentences.
- Circle the single main metric.
- Agree wording everyone will reuse.

A reliable structure

1.Problem + users 2.Approach + design 3.Implementation 4.Evaluation 5.Demo 6.Limitations + next steps

Slide	Title	1 key message	Evidence	speaker	Time
1					
2					
3					
4					
5					
6					

Rule of thumb: one idea per slide; ~1 minute per slide; define acronyms/metrics once.

Fill in the table (20 minutes)

University of Exeter

Task 2

As a team:

- Fill the table for 6 slides.
- Assign speakers + timings.
- Name evidence for each slide.

Task 3 - Provide "evidence" before the demo – 10 minutes

Pick evidence you can defend. Fill in:

We will show _____

It proves _____

For example:

We will show screens of working features

It will prove the project is implemented and can be used

Task 4: Demo plan – 20 minutes

1. Write 1 sentence to say before the demo:
"In the next 90 seconds we'll show how _____(**user)** can _____(**key task)**, ending with ___(**result**.)"

2. Write your 3-step click path:
Step 1: _____
Step 2: _____
Step 3: _____

3. Write your backup plan (if it breaks)
Backup: _____ (screenshots / video)

Example:
"In the next 90 seconds we'll show how a student can submit a support request, ending with a confirmation message."
Steps: Home → New request → Submit.
Backup: 4 screenshots of each step.

Delivery + Q&A: 10 minutes

University of Exeter

Delivery

- Time it; cut what's not essential
- One key point per slide

Q&A

- Repeat the question → answer first → justify
- If you don't know, say what you'd test next

Task 5

- Do a **1-minute team pitch** using your fill-ins (each person speaks once).
- Write **one cut** (remove one extra detail)

- Write **5 likely questions**.
- Choose the **best 3** and write **1-line answers**.
- Assign who answers each.

Report outline: 15 minutes

University of Exeter

Core sections

- Executive summary (what you achieved)
- Problem + requirements (incl. constraints)
- Design (architecture, data flow, rationale)
- Implementation (key components, tools)
- Evaluation (tests, metrics, results)
- Conclusion + future work

Task 6

As a team:

- Create the outline
- Assign an owner per section.
- ← keep in mind the core sections

Report evidence : 15 minutes

University of Exeter

Core sections

- Executive summary (what you achieved)
- Problem + requirements (incl. constraints)
- Design (architecture, data flow, rationale)
- Implementation (key components, tools)
- Evaluation (tests, metrics, results)
- Conclusion + future work

Task 7

As a team:

- List the evidence each core section will use (for example, screenshot, table, diagram, test result, user feedback etc).

← keep in mind the core sections
